ARTIFICIAL INTELLIGENCE

You have probably heard the term AI used quite a lot lately, and everywhere! AI (or Artificial Intelligence) has taken off in the past few years and has become more powerful than we could have imagined. I will cover one of the most popular AI clients, ChatGPT.

ChatGPT is a powerful AI language model by OpenAI, and aids with various tasks, from answering questions to engaging in conversations. It helps with writing, generating ideas, learning, and chatting. You can access it on the web at ChatGPT.com

Simply type your message or question, and ChatGPT will provide relevant and thoughtful answers. Ask about anything—science, literature, technology, advice, or creative projects. As you interact, ChatGPT will adapt to your style, making the experience personal and conversational.

THIS PARAGRAPH WAS DIRECTLY FROM CHATGPT:

GPT stands for **Generative Pre-trained Transformer**.

- **Generative**: This means the model can generate text or responses based on the input it receives.
- **Pre-trained**: Before being used in real-world applications, the model is trained on vast amounts of text data from books, websites, and other sources. This training helps it understand language and generate relevant responses.
- **Transformer**: This refers to the underlying architecture used in GPT, which is particularly effective at processing and understanding sequences of words. Transformers allow the model to pay attention to the context of words in a sentence, making it good at tasks like translation, summarization, and conversation.

In short, GPT is a model designed to generate human-like text based on patterns it learned from a large corpus of data.

I have used ChatGPT to help with writing sympathy letters, coming up with recipe ideas (simply tell it what you have on hand!), and ideas for a birthday party. You can use ChatGPT in place of Google for many queries, and you will be amazed at the results!

ChatGPT can also create images that are very realistic in just a few seconds. Here are a few I created and the prompts given:

A bald man feeling under the weather

The Pope fishing with a dog
